PAST PERFORMANCE

Scope of Work

Primary scope includes the following drone-as-a-service solutions:

- Defense Contractor UAV Manufacturing
- Plant Tracking and Monitoring
- Field Mapping
- Thermal Scanning
- Multi-spectral Sensor Data Acquisition
- Security Surveillance
- Software Development
- Drone Technology Innovation
- Drone Manufacturing to Specification
- Drone Light Shows & Entertainment

DIFFERENTIATORS

- Proven reliability and dependability in every phase of our services
- Responsive to client's business needs pertaining to customizability and assistance
- 24/7 software, hardware, technical and customer support
- Provided comprehensive data analytics with unique reporting and transparency for standard government compliance
- Efficient real-world and people-oriented approaches to addressing business issues
- Tier 1 drone manufacturing capabilities and vendor relationships

TECHNICAL SERVICES

To guarantee high safety and dependability, we have rigorously tested our manufactured unmanned aerial vehicles and smart applications. We uphold the customer-first philosophy, deliver first-rate service, and work to optimize user benefits. Our tech team consistently expands the drone's added value, offering customers knowledgeable business counsel and technical support, demonstrating the creative "smart drone" advantage.

DEDICATED TEAM

Partnering with Global Air Entertainment, Inc. gives you access to cross-functional teams that deliver drone software and hardware services quickly and with quality at the forefront of all we do. Because effective communication is the key to accelerating delivery, all of our specialist tech teams are in the US and have extensive industry knowledge and USA manufacturing capabilities.

CORE COMPETENCIES

GAE aims to revolutionize drone manufacturing, security, surveillance, inspection, detection, and scanning needs of various corporate, industries, commercial and government sectors. Our technology continuously adapts to the different needs of many companies and sectors requiring customization of drones and attachments to meet operation specifications.

We offer several customizable drone-as-a-service solutions to meet your organizational needs:

- Surveillance and Tracking
- Machine Learning Systems
- Inspection and Monitoring
- Software Development
- Scanning and Detection
- Drone Entertainment
- Project Management
- On-Site Remote Assist
- Artificial Intelligence
- Drone Manufacturing
